

SAIRA BANO

Senior Full Stack Engineer | Solution Architect | Node.js • React.js • AWS • Microservices

Chandigarh, India • sairaansari.12j@gmail.com • +91 99888 59974 • [linkedin.com/in/saira-ansari](https://www.linkedin.com/in/saira-ansari) • 11+ Years Experience

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 11+ years of experience designing and delivering scalable enterprise applications across fintech, e-commerce, marketplace, and service domains. Expertise in Node.js, React.js, TypeScript, AWS, Microservices, RESTful APIs, and System Design.

Successfully delivered 15+ enterprise applications, mentored development teams, and architected an OpenAPI migration and validation solution at PayPal that reduced API specification errors by 70%. Proven track record in cloud-native development, API governance, CI/CD, and building secure, high-performance applications.

KEY ACHIEVEMENTS

- Delivered 15+ enterprise applications across FinTech, E-commerce, Marketplace, and Enterprise domains
- Designed and implemented scalable REST APIs and microservices using Node.js and AWS
- Contributed to PayPal's OpenAPI governance initiative, supporting migration and validation for 240+ internal APIs
- Led HLD/LLD documentation, code reviews, and mentoring of development teams
- Successfully delivered cloud-native solutions using AWS, Azure, Docker, and CI/CD pipelines

PROFESSIONAL RECOGNITION

- Received a formal recommendation from a PayPal Software Development Manager recognizing technical excellence, engineering leadership, ownership, and customer-facing collaboration within the API Management Platform.
- Recognized for leading API governance initiatives, OAS2→OAS3 migration, Spectral validation tooling, Harness CI/CD integration, and serving as the primary point of contact for stakeholders.

CORE COMPETENCIES

- Full-Stack Development (MERN Stack – MongoDB, Express.js, React.js, Node.js) for Enterprise & Cloud-Native Applications
- System Design (HLD & LLD), Software Architecture, Distributed Systems & Scalable, High-Availability Systems
- Event-Driven Architecture & Message Queues (SQS)
- RESTful APIs, GraphQL, Microservices & API Gateway Design
- Cloud Platforms: AWS (Lambda, EC2, S3, Beanstalk, SQS, IAM, Cognito) & Azure
- Database Design & Optimization (MySQL, PostgreSQL, MongoDB, Redis, Sequelize, Mongoose)
- Authentication & Authorization — OAuth2, JWT, Security Best Practices
- Performance Engineering, Scalability & High Availability
- CI/CD Pipelines (Jenkins, Harness), Containerization (Docker), Monitoring, Logging, Alerting & Observability
- API Design, OpenAPI/Swagger, Spectral Validation & API Governance
- Agile/Scrum, Code Reviews, Technical Leadership & Mentoring

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Node.js, Express.js, React.js, Redux, Core Java, Spring Boot, Kotlin

Frontend: HTML5, CSS3, Bootstrap, jQuery, Responsive Design, UI/UX Principles

APIs & Architecture: RESTful APIs, GraphQL, Microservices, API Gateway, Event-Driven Architecture, Message Queues (SQS), OpenAPI/Swagger, Spectral Validator

System Design & Patterns: HLD/LLD, Software Architecture, Distributed Systems, Design Patterns, SOLID Principles

Security & Auth: OAuth2, JWT Authentication, Authorization, Security Best Practices

Databases: MySQL, PostgreSQL, MongoDB, Redis, Sequelize ORM, Mongoose ODM

Cloud & DevOps: AWS (Lambda, S3, EC2, Beanstalk, SQS, IAM, Cognito), Azure Deployment, Docker, Jenkins, Harness CI/CD, Monitoring, Logging, Alerting & Observability, NPM Package Publishing

Testing & QA: Jest, Mocha, Chai, Unit & Integration Testing, Postman, Swagger

Tools & Platforms: Git (GitHub, GitLab, Bitbucket), Jira, Confluence, VS Code, Agile/Scrum

AI-Assisted Development: GitHub Copilot, Cursor AI, Claude AI, Prompt Engineering, LLM-assisted Development, AI-powered Debugging.

Generative AI & RAG: LLMs, AI APIs, LangChain, Document Loaders, Text Splitters, Embeddings, Vector Databases, Retrievers, and RAG Architecture.

AI Integration: Structured Prompting, JSON Schema-based Outputs, and integrating LLMs into modern software workflows.

PROFESSIONAL EXPERIENCE

Senior Consultant | Optimum Infosystem (Client: PayPal)

Aug 2024 – Feb 2026

- Owned API Governance standards and led OAS3 migration execution — architected an OpenAPI validation tool (OAS2→OAS3) with Spectral integration, **reducing specification errors by 70%**
- Authored HLD/LLD design documentation and custom Spectral rulesets; published the validation framework as an **internal npm package**, driving adoption across **200+ internal APIs** within PayPal's internal engineering teams
- Improved developer experience by creating comprehensive OAS3 documentation with violation examples, compliance standards, and resolution guidance for engineering teams
- Drove internal adoption across distributed, cross-functional teams and led migration of CI/CD tooling from Jenkins to Harness, managing automated deployment, production releases, and npm package publishing
- Created API migration guides and partnered with cross-functional teams to design validation algorithms

Backend Developer | Wunderman Thompson

Feb 2024 – Jul 2024

- Developed backend services for multiple Opco implementations using RESTful APIs built on OpenAPI specifications
- Optimized database queries and deployed applications to Azure via automated CI/CD pipelines

Senior Software Consultant | Seasia Infotech

Nov 2018 – Oct 2023

- Delivered 8+ enterprise applications serving thousands of users using Node.js, React.js, AWS, and Microservices.
- Mentored a team of 3–5 developers, conducted code reviews, and implemented GraphQL APIs with real-time updates
- Built reusable React component libraries with Redux state management; developed native Android apps in Kotlin
- Containerized applications with Docker and established CI/CD pipelines, achieving **80%+ test coverage** using Jest, Mocha, and Chai

Software Developer | Relinns Technologies

Dec 2017 – Sep 2018

- Designed RESTful APIs and integrated third-party services, including payment gateways
- Developed Android mobile applications using Kotlin and resolved production issues

Software Developer | ItSoftDigital Solutions

May 2016 – Nov 2017

- Developed backend services and RESTful APIs using Node.js and Express.js
- Built Android applications with Kotlin and performed MySQL database design and optimization

KEY PROJECTS

Spectral Validator — OpenAPI Migration Tool (PayPal)

- Contributed to the solution architecture** by participating in HLD/LLD, API design, security and performance reviews, and code reviews for an enterprise OpenAPI migration platform. Built an end-to-end OAS2→OAS3 validation tool with custom

Spectral rulesets, published as an internal npm package adopted across **240+ internal APIs**, reducing specification errors by **70%** and accelerating migration timelines. Managed **Harness CI/CD pipelines** to support automated builds and deployments.

MGM VIP Host (MGM Resorts)

- Built a VIP customer management application with real-time updates using React.js and GraphQL

Spark Seeker — Broadcast Platform

- Architected a microservices-based broadcast platform on AWS with automated CI/CD (Node.js, MongoDB, React.js)
- Contributed as a Solution Architect by designing HLD/LLD, defining scalable microservices and cloud architecture, reviewing technical designs, and mentoring development team

Mr. Jet & Groceries King — Delivery Management Platforms

- Built full-stack delivery platforms with admin panels and real-time order tracking (Node.js, EJS, React.js, MySQL, Sequelize)
- Contributed to solution architecture by participating in HLD/LLD, application design, API design, security, performance optimisation, and code reviews for a monolithic delivery platform deployed on AWS EC2. Built full-stack features including admin panels and real-time order tracking using Node.js, React.js, EJS, MySQL, and Sequelize

Additional Projects: Cere Kart (multi-vendor marketplace) · Laundry Day (service booking, South Africa) · Maxi Scooter (rider management with GraphQL) · Cere Home (on-demand home services) · ICMS (event management & ticketing)

EDUCATION

B. Tech, Computer Science Engineering — 89%

Punjab Technical University (PTU) | 2015

PROFESSIONAL COMPETENCIES

Leadership: Solution Design, Requirement Analysis, Stakeholder Communication, Team Leadership, Client Interaction, Sprint Planning, Agile Delivery, Code Reviews, Technical Mentoring

Development Practices: Clean Architecture, CI/CD, TDD, API Governance, Release Management

LANGUAGES

English • Hindi • Punjabi
